

Access Simplified

Improve your tenant experience and streamline workflows with Storable's fully integrated Access Control software.

Q1 Why does Storable's cloud-based Access Control provide a better solution than the competition?

A1 More secure and easier to manage

Don't be tied to your desktop. When access control is embedded in your facility management software, you can manage access points and hours, export activity logs, and keep operations secure wherever you are for easy reporting and better decision-making.

Q2 What are the advantages of using Storable's integrated Access Control?

A2 Streamlined workflows and superior support

Increase efficiency and revenue when you automate access management. Move from separate platforms to one intuitive solution to keep access running smoothly for your tenants. And count on Storable's expert support team for responsive service and solutions across all your Storable products.

Q3 What's the installation and setup process like for Access Control by Storable?

A3 Seamless

Storable Access Control provides an easy installation process that doesn't include complicated equipment or mandatory network installers. Whether you're looking to install it yourself or use your own preferred contractor, we include everything you need to get started.

Q4 How does the software manage delinquent tenant access?

A4 Automated notifications and lockouts

Save time by no longer manually monitoring tenant access and payments. Access Control will automatically lock out your tenants if payments are missed. If a tenant attempts to access your facility while delinquent, their access will be denied, and they'll automatically receive an SMS with a payment link to restore their access (storEDGE users only).

Q5 What about non-tenant access, like employees or contractors?

A5 Easy to manage, track, and update

Track and adjust employee and contractor access points in real time for better security and cost efficiency. Ensure tenants and staff are secure on site and that contractor services are completed on schedule with Access Control's exportable activity logs.

Streamline Your Access Control

Optimize for secure, efficient facility access and get down to business with Access Control by Storable.
